The Phases of the Moon

New Moon: It is the first phase that appears in a crescent shape above the horizon after the sun goes down. It is the phase of peace, happiness and abundance.

First Quarter: It is the phase when it is seen in a semicircle, seen one week after the new moon state. It is the phase of success, energy and peace.

Full Moon: It is the phase seen in the form of a circle one week after the first quarter. On the 15th of the month, the Moon takes the form of a full moon. It is the phase of danger, fear, impudence, famine, chaos.

Last Quarter: A week after a full moon, half of the moon is seen as a semicircle. It is the stable, plain, simple phase.

Old Moon: Approximately 28 days after the New Moon phase, the Moon is seen as a crescent again. Regeneration is the energetic phase.

Conjunction: The Moon is between the Earth and the Sun. Today its dark side faces the Earth. For this reason, it cannot be seen from the world as the sun does not reflect its rays to the Earth. The New Moon state occurs one day later in the conjunction phase. It is a phase of pessimism, irritability, abstention.
